

Ever wondered what it would feel like to experience your cars limits, in a safe and controlled environment?

John Burnet and Ken Pavri have decades of experience in motorsports and advanced driver coaching. Along with their team of professional coaches they will show you, one on one, how to apply the same driving techniques employed by racers. These techniques will make you a better controlled and confident driver in all weather and road conditions. The smile on your face at the end of the day is just the icing on the cake!

Other Services Available

- Custom event tailored to your requirements
- Personal coaching
- Driver skills evaluation (seniors)
- Confidence builder coaching
- Competitive motorsport mentoring
- Race Licence Academy

Call : (416) 255-4222

Sanctioned by ASN Canada FIA to conduct
race schools for a National B licence
at Shannonville Motorsport Park

The Brack program is ideal for:

- **Novice drivers.**
- **Drivers wishing to learn advanced accident avoidance and skid control skills.**
- **Professional drivers wishing to master their driving skills.**
- **Drivers interested in motorsport activities who want to get a flavour for the sport.**
- **Prerequisite for the race license program**

Our program is typically a one-day event utilizing the full Shannonville Motorsport Park facility to ensure a safe environment, so that participants can concentrate on the new skills being presented and practised. The day consists of both classroom and hands on practice with personal coaching. Participants are required to bring their own car.

Event Location?

The Shannonville Motorsport Park Driving Academy in Belleville Ontario is one of the most ideal places for drivers to learn; how to handle their car in a controlled environment. For group or private events other locations are available.

What is the cost?

The cost of a course is a lot less than the repair to your car, if you were involved in an avoidable accident, not to mention the aggravation getting your car repaired and/or to get yourself mended.

How will this course benefit me?

Our objective is to provide the every-day driver with the confidence, understanding and skills to avoid an incident in any weather condition. Drivers will be able to instinctively react to emergency situations as they will have a practical understanding of how their car will react to evasive manoeuvres to avoid an unpleasant “moment”.

Here are some questions to ask oneself:

- *Am I a nervous driver?*
- *Do I instinctively know what I should do to avoid an accident with little notice or time to think?*
- *Is braking the best option in a panic situation?*
- *What is the difference between braking then turning and turning then braking?*
- *Do I know the handling limits of my car at various speeds and know how to reach them safely?*
- *What are the braking characteristics of my car in a full emergency stop at speed?*
- *Can I predict how the “other” driver will likely react and what that means to my escape route?*
- *How do I quickly find the best escape route in an emergency?*
- *Do I want to be a more proficient and safe driver?*

These questions will be answered by taking this course.
